Public Health Department Nursing Workforce Survey

The Promoting Nursing Education in Kansas (PNEK) grant is a Robert Wood Johnson Foundation-funded State Implementation Program project being conducted by investigators at University of Kansas School of Nursing and Pittsburg State University School of Nursing. The purpose of the project is to support academic progression for Kansas nurses. To achieve this goal, we need first to establish baseline metrics for the current RN workforce in Kansas.

We appreciate your assistance in completing this survey regarding the nursing workforce at your organization. Please

provide your best estimate, if you do not have the exact reported only in aggregate form.	t data. All information will be kept confidential and findings will be
